Approved by Resolution #2011-11.08 of the Danville City Council  
November 15, 2011

*Introduction: Written, adopted financial policies have many benefits, such as assisting elected officials and staff in the financial management of the City, saving time and energy when discussing financial matters, engendering public confidence, and providing continuity over time as elected officials and staff members change. While these policies will be amended periodically, they will provide the basic foundation and framework for many of the issues and decisions facing the City. They will promote sound financial management and assist in the City's stability, efficiency, and effectiveness. Policies are designed to conform to state and local regulations, generally accepted accounting standards, standards set by the Governmental Accounting Standards Board (GASB) and the Government Finance Officers Association (GFOA), and best practices employed by other local governments. The City Manager's "Administrative Policies & Procedures" and operating procedures maintained by municipal departments supplement these Financial Policies.*

---

## **1. Guiding Principles**

The City provides a wide variety of essential and desirable services and facilities to its residents, visitors, businesses, and institutions. The Danville City Council and staff are responsible for managing municipal finances wisely, ensuring adequate funding to meet current and future needs, appropriately accounting for all revenues and expenditures, and complying with all applicable regulations. To satisfy these obligations, the Council and staff are committed to developing a sound financial plan for municipal operations, maintenance, and capital improvements. To achieve this, the City Council:

- Establishes financial policies;
- Sets policy guidance for preparation of operating and capital improvement budgets;
- Adopts budgets for all funds based on adopted policies and in accordance with the City Charter and State laws; and
- Oversees the administration of finances and budgets undertaken by the City Manager.

## **2. Financial Structure**

In accordance with the GASB, the financial structure of the City will be divided into tax-supported governmental funds (including a General Fund to support the governmental services of the City) and self-supporting proprietary funds established for nongovernmental purposes. Proprietary funds will include a series of enterprise funds, which shall be managed as business enterprises supported by

revenues derived by that enterprise. A list of funds with descriptions of each is provided in the Appendix of this document.

### 3. Budget

The Council will annually adopt a budget that includes funds as may be required by law or by sound financial practices and generally accepted accounting principles. The budget will control the levy of taxes and expenditures for all City purposes during the ensuing fiscal year. The City budget will be balanced using approved funding sources, including fund balances. The annual budget will serve as the official plan of services and facility operations intended to accomplish the City's goals and objectives.

#### 3.1 Budget Preparation & Adoption

The budget process is one of the most important undertaken by the City each year. However, the City Charter provides only minimal guidance on how the budget is to be prepared, reviewed, and adopted.\* It simply states that

- The City Manager is responsible for preparation of the budget;
- A proposed budget is to be presented to the City Council no later than April 1<sup>st</sup>;
- No more than 30 days later, after collaboration with the Council, the Manager is to introduce a completed budget;
- A brief synopsis of the budget is to be published in the newspaper and Council is to conduct a public hearing; and
- The budget is to be adopted before July 1<sup>st</sup>.

The City Council and City Manager will exceed the minimum requirements by starting the process earlier, providing more direct Council guidance along the way, and encouraging more active public engagement throughout the process, including during the City Manager's budget preparation process. The City Council will similarly exceed minimum requirements in conducting additional budget hearings and encouraging public input through not only providing testimony at hearings, but also through e-mails, social media tools, telephone calls, and direct discussion. The budget process undertaken by Council and staff will endeavor to

- Maintain a transparent process;
- Provide a steady flow of readily available information to the public;
- Inform, involve, and engage the public;
- Identify and consider issues and concerns of the public; and

---

\* City Charter, §3-3, §8-6, and §8-7

- Achieve public understanding, if not acceptance, of trade-offs and decisions made in adopting a balanced budget.

### **3.2 Revenue & Expenditure Forecasts**

Budget revenue estimates will be conservative, yet realistic. Expenditure estimates will fully cover, but not overstate, projected costs. A five-year forecast of General Fund revenues and expenses will be prepared at the beginning of each budget process to help determine if projected revenues can sustain current services. The City Council will consider the five-year forecast and other information provided and set priorities and offer guidance at the outset of the City Manager's annual budget preparation process. Council will additionally at that time make desired modifications to Financial Policies that might affect the budgeting process.

The City will avoid dependence on temporary or unstable revenues to fund main-stream municipal services. The City will not use one-time revenues to fund ongoing operational costs. Neither will debt be used to fund current expenditures. The City will strive to maintain a reasonable real estate tax rate and will only consider upward adjustments to the property tax as a last resort.

If a deficit is projected for the coming fiscal year, the City will take steps to reduce expenditures and/or increase revenues. If a deficit is caused by emergency or temporary economic conditions, Council may consider a transfer from the Budget Stabilization Fund or the Unassigned Fund Balance to balance the budget as described in Policy 4.

### **3.3 Service & Facility Charges**

Many services and facility uses are allowed by the City without additional charge. Examples include general use of parks and emergency responses by police officers. Services or facility uses that solely benefit an individual or group and can be practicably controlled and priced will be provided at reasonable fees. The City will maximize the application of user charges rather than depending on general revenues and subsidies from other City funds for services so identified and where costs are directly related to the level of service provided. The following principles will apply in establishing user fees:

- City staff will provide services and facilities as efficiently as is possible to keep user fees reasonable and affordable.
- City Council will determine under what circumstances cost subsidies, discounts, or waivers will be granted.
- User fees will otherwise be set at levels that recover full costs, including all direct, capital and facility wear and tear, and overhead expenses.

- Reimbursable work performed by the City shall be billed at actual costs except in cases where firm estimates and/or “not-to-exceed” prices were quoted to a client.
- Where practical, user charges shall be comparable to other neighboring cities and private sector providers. In the interest of doing no harm to other local service and facility providers, whether in the private or non-profit sectors, the City will avoid undercutting rates charged by others in Danville.

Departments that impose fees or service charges will prepare and/or update them for inclusion in the annual budget process. Responsibility for consideration and adoption of fees is assigned to the City Council or its boards and commissions as authorized\*. The City will maintain a current schedule of fees and charges, showing when the fees were last reviewed and/or recalculated.

### **3.4 Budget Contingency Accounts**

Annual budgets will be stripped of informal contingency accounts to protect against expenditure overruns. The City Manager will instead propose appropriation of Contingency Accounts in the General Fund and each utility fund to cover unanticipated expenditure needs. The Contingency Account for each applicable fund shall be established at a minimum of \$100,000. If approved by City Council through its appropriation of the budget, Contingency Accounts will be used at the direction and approval of the City Manager.

### **3.5 Capital Improvement Plan**

In addition to the operating budget, the City Manager will annually submit a five-year Capital Improvement Plan (CIP) for review by Council. The CIP will include new or expanded facilities; infrastructure projects; extraordinary maintenance projects; land acquisition; special initiatives such as blight eradication or River District revitalization; large equipment items such as fire trucks; and large computer, telecommunications, and other technology investments. Normally, any such expenditure of \$50,000 or more will be included in the CIP. As with the operating budget, items included in the CIP are those considered necessary to maintain public services and facilities. The CIP will show proposed expenditures and associated revenue sources. Current revenues and grants are the preferred methods of financing rather than borrowing. Operating impacts of CIP elements will be reported in the plan.

### **3.6 Legal Level of Control**

Budget appropriations shall be legally controlled at the fund level. The City Manager is delegated authority to administer the budget within appropriated fund levels. In accordance with state code, municipal appropriations made to the

---

\* For example, by the Danville Utility Commission in the case of non-consumption fees and charges associated with the City's utilities.

Danville Public Schools (DPS) are administered independently under the authority of the School Board. The DPS is allowed to carry forward \$1 million of its unencumbered municipal appropriation at the end of each fiscal year without further consideration and approval by the City Council.

### 3.7 Budget Administration

The City Manager and department directors are responsible for continuously monitoring revenues and expenditures and for carefully administering adopted budgets. The City Council will receive monthly financial reports and briefings. Council's boards, commissions, and committees charged with budgeting responsibilities will similarly be kept informed.

The City will take immediate corrective actions if, at any time during the fiscal year, expenditure and revenue estimates are such that an operating deficit is projected at year-end. Corrective actions may include a hiring freeze, expenditure reductions, fee increases, or use of contingencies. The City Council may approve additional measures as appropriate.

## 4. Fund Balances

Sufficient reserves must be retained by the City at all times to provide financial stability. A properly sized and configured fund balance in each operating fund is essential in accomplishing this. The Governmental Accounting Standards Board requires that General Fund balance elements be structured in five categories that span a continuum of use constraints that classify a fund's net resources from those that have the most constraints placed on their use to the least. What was formally accounted for as the "unrestricted" fund balance is now separated into "assigned" and "unassigned" fund balance accounts.\*

- Nonspendable Fund Balance -- amounts that cannot be spent because of form (such as inventory) or because of legally or contractual requirements (such as the principal of an endowment fund, pre-paid items, or long-term receivables).
- Restricted Fund Balance -- amounts that are constrained to being used for a specific purpose by external parties (such as grantors, bondholders, or the state or federal governments), through constitutional provisions, or by enabling legislation. Such restrictions normally cannot be removed by City Council.
- Committed Fund Balance -- amounts committed by ordinance for specific purposes by the City Council itself. Council can likewise remove such constraints through an amending ordinance. These relate to expenditures that are not expected to occur routinely. Examples

---

\* GSAB Statement No. 54, "Fund Balance Reporting and Governmental Fund Type Definitions," effective for fiscal periods beginning after June 15, 2010.

include reserves established by Council to construct a new facility or to purchase property for an industrial park.

- Assigned Fund Balance -- amounts that Council sets aside for specific purposes, but with fewer restrictions than intended with restricted or committed fund balance amounts. Examples include the City's special revenue, capital project, debt service, and budget or rate stabilization funds.
- Unassigned Fund Balance -- amounts that have not been restricted, committed, or assigned and are therefore available for any Council-authorized purpose.

In the case of municipal funds other than the General Fund (for example, utility and enterprise funds) assigned and unassigned fund balances remain combined in "unrestricted" fund balance accounts.

#### **4.1 Unassigned & Unrestricted Fund Balances**

Unassigned or unrestricted fund balances are important in maintaining financial stability and are considered by bond rating agencies as key indicators of credit-worthiness. They provide the financial resources to deal with emergencies, natural disasters, precipitous economic downturns, revenue shortfalls, and unanticipated expenditures. They also provide cash flow liquidity in responding to fluctuations in major revenue sources, such as with property tax receipts. Unassigned and unrestricted balances themselves generate revenue through investment interest earnings.

The City Council designates the following minimum levels for unassigned and unrestricted fund balances:

- General Fund -- The unassigned General Fund balance shall be maintained at a level not less than 20% of operating revenues.
- Utility Funds -- The Water, Wastewater, Gas, Electric, and Telecommunications Funds shall maintain unrestricted fund balances equal to at least 90 days of average operating and maintenance expenses, inclusive of transfers to the General Fund, plus 90 days of the next fiscal year's debt service payments.

During recent years, the Wastewater Fund has been running a deficit and has depleted its unrestricted fund balance. The City's goal is to bring the Wastewater Fund into compliance by FY 2017. During this time, the combined Utility Funds will collectively adhere to this unassigned fund balance policy, meaning the other utility funds will maintain higher than normal levels of cash reserves.

- Other Funds -- The City's other enterprise, internal service, special, and fiduciary funds will be budgeted to fully cover expenses but will not at this time be subjected to unassigned or unrestricted fund balance standards.

Actual fund balance levels may rise and fall during the fiscal year, but will be restored to designated levels during the annual budgeting process. An appropriation from an unassigned or unrestricted fund balance that would result in the balance falling below its designated level requires a majority plus one vote of Council (with six of nine members voting “aye”). No such vote shall be taken until the Council receives a briefing from the City Manager that identifies potential ramifications of the appropriation and includes a financial plan to restore the unassigned or unrestricted fund balance to its designated minimum level within two years.

Because the City’s budgets are based on appropriately conservative revenue and expenditure budget projections, it is to be expected that at least some surplus revenue will be added to fund balances at the end of each fiscal year. Surpluses may be appropriated for specific expenditures by the City Council or assigned to fund balance accounts, normally to unassigned or unrestricted fund balances. Unassigned and unrestricted fund balances in excess of established minimum levels may be appropriated by Council for nonrecurring expenditures such as unanticipated budget shortfalls, economic development incentive payments, special projects, acquisition of real property, capital purchases, local matches for grants, pre-payment of existing debt, prepayment of equipment maintenance contracts, and one-time employee pay bonuses. Except during periods of economic recession or under unusual circumstances, excess funds will not be used to support routine operating expenditures. Nor will availability of excess cash reserves be allowed to supplant prudent budgeting practices.

#### **4.2 General Fund Budget Stabilization Reserve**

**Amended by Resolution 2015-05.03 of the Danville City Council, May 5, 2015**

As part of the FY 2012 Budget process, the City Council authorized creation of a Budget Stabilization Fund as part of the General Fund’s assigned fund balance using revenues in excess of its designated 20% unassigned fund balance level. The Budget Stabilization Fund will not be used to finance new or expanded services. It is instead intended to help sustain municipal operations during times when revenue sources such as property, sales, meals, and business tax receipts are sluggish due to continuing effects of the economic recession or continuing response to emergencies. As it deems appropriate, the City Council will appropriate revenue from the Budget Stabilization Fund for use during the current or coming fiscal year to sustain current municipal service levels.

The fund is subject to the following restrictions:

- There is no designated minimum size for the Budget Stabilization Fund. It may, from time to time, be drawn down significantly or even depleted entirely. The fund does, however, have an upper limit. Its maximum size will not exceed a balance of \$3,000,000. *(R2015-05.03)*

- The Budget Stabilization Fund will retain interest earnings on the balance of revenues held in the fund.
- After allocation of surplus revenues to designated fund balance reserves, up to one-half of remaining General Fund revenue surpluses will be transferred to the Budget Stabilization Fund at the closing of each fiscal year, subject to its aforementioned maximum size limit.
- The Budget Stabilization Fund is not to be used to offset minor revenue shortfalls. Appropriations from the fund to balance the coming year's budget will be made only in the event that total projected ongoing General Fund revenues are expected to decline more than one percent below the current year's estimated receipts.
- As the Budget Stabilization Fund has no direct revenue source of its own to replenish expended resources, care will be taken in its use.
- Use of the Budget Stabilization Fund will not take the place of prudent budgeting practices that carefully establish appropriate services and service levels, properly maintain municipal facilities, undertake important initiatives, and set fees, charges and taxes necessary to pay associated expenditures.
- Spending cuts or other cost-saving measures must be undertaken in combination with use of Budget Stabilization Fund revenues.

### **5. Utility Contributions to the General Fund**

The Electric, Gas, Water, Wastewater, and Telecommunications Fund all make contributions to the General Fund at levels meant to approximate taxes that would be paid to the City were these enterprises run by private sector utilities, as well as profit that would be earned by shareholders. Total utility fund transfers budgeted for FY 2013 amount to \$14,382,000, constituting approximately 15% of General Fund revenues.

FY 2013 Utility Fund contributions to the General Fund are designated as the base rates for these transfers. Transfers from the Telecommunications Fund are handled separately because its primary customers are the City itself and the Danville Public Schools.

---

FY 2013 General Fund  
Contribution Amounts

---

Electric Fund	\$	9,562,610
Gas Fund		2,906,330
Water Fund		933,300
Wastewater Fund		677,760

To emulate tax burdens imposed on taxable utilities in other communities, transfers from Utility Funds to the General Fund will be increased based on the growth in net fixed assets. The increase in the transferred amount from a utility fund will be calculated on the basis of half of the average proportional growth of that fund's net fixed assets (fixed assets less depreciation) over the previous five fiscal years, rounded to the nearest thousand. In order to preserve the City's credit score with American Municipal Power, the Electric Fund will have the additional requirement that a minimum of six months cash reserves be maintained.\* In no event will contributions from the Electric, Gas, Water, and Wastewater Funds be reduced from one year to the next. Applicable adjustments in the General Fund contributions will be implemented every other year as part of the biennial utility rate studies.

---

\* Cash reserves = [annual operating expense (excluding purchased power cost and depreciation) + regular capital maintenance + capital improvements] X (.50 or 180 days/ 360 days)

This does not change the City's Fund Balance Policy, but rather guarantees American Municipal Power the City's Policy will meet or exceed their requirements.

## 6. Biennial Utility Rate Studies

Under the direction of the Danville Utility Commission, the City shall undertake a utility cost-of-service and rate study every two years. The City will endeavor to set utility rates that are consistently

- Fair, just, and reasonable;
- As low as is prudently possible;
- Structured in a fashion consistent with best utility practices; and
- Generate revenue sufficient to
  - Support continued provision of reliable, safe, environmentally responsible, high quality service;
  - Sustain infrastructure required to accommodate economic development; and
  - Generate sufficient revenue to meet established General Fund contribution obligations.

## 7. Vehicle Replacement

The City's vehicles are to be used in a fashion that yields the highest possible return on investment. Factors taken into account in determining when each vehicle is replaced will include safety, cost of operation, and resale value. When prudent to do so, a vehicle may be transferred after a time from an organizational unit with intense vehicle operating requirements (i.e., Police Patrol) to another with lower operating demands (i.e., Police Detectives or Building Inspections). While each will be retained as long as it can be driven safely and cost-effectively, the following guidelines will be used for replacing vehicles and large equipment items.

Replacement Guidelines	
Sedans, & Bucket or Digger Derrick Trucks	10 years or 100,000 miles
Pickup Trucks & Vans	12 years or 100,000 miles
Other Equipment	12 years or 10,000 hours

Old vehicles replaced by new ones will be sold as soon as practicable. The City will avoid "fleet creep" wherein use of old, replaced vehicles is continued. If additions to the fleet can be justified, they will be included in the City Manager's proposed budget and considered by City Council.

The City's utilities finance their own fleets. Vehicles operated by General Fund departments and other funds are financed through the Motorized Equipment Fund. Vehicle rental rates are charged for applicable vehicles at rates established by the City Manager. Rental rates are reviewed annually and revised as needed to ensure that sufficient funds are available to replace vehicles.

## 8. Investments

Investment of revenues will be made in conformance with best practices to meet four primary objectives:

- Safety – to preserve invested funds with minimal risk of loss
- Diversity – to avoid excessive market risk
- Liquidity – to maintain sufficient to meet cash flow and operating requirements
- Yield – to produce maximum interest earnings

City Manager is responsible for control of City revenues. Responsibility for investing idle funds is delegated to the Finance Director.

All excess cash, except for cash in certain restricted and special accounts, will be pooled for investment purposes. The investment income derived from the pooled investment account shall be allocated to the contributing funds based upon the proportion of the respective average balances relative to the total pooled balance. Interest earnings shall be distributed to the individual funds not less than annually.

## **9. Debt Management**

City recognizes the primary purpose of facilities and equipment is to support provision of public services. Using debt financing to meet the capital needs of the community, the City must balance between debt financing and "pay-as-you-go" methods. The City realizes failure to meet the demands of growth may inhibit its continued economic viability but also realizes too much debt may have detrimental effects.

### **9.1 General Authority**

The Constitution of Virginia and State Code authorizes localities to issue debt within certain limitations. The Constitution restricts the amount of General Obligation debt – that is, debt payable from general municipal revenues and backed by the full faith and credit of a city – to 10% of the assessed valuation of real property in the jurisdiction plus any applicable limitations set forth in the city's charter. In determining the debt applicable to the 10% legal debt limit, the following types of debt are excluded:

- Notes issued in anticipation of the collection of revenue and maturing within 12 months;
- Bonds secured by the full faith and credit of the municipality, for which the principal and interest payments are made with revenues earned by the utility or facility (double-barrel bonds);
- Bonds of the municipality, the principal and interest on which are payable exclusively from the revenues and receipts of a utility system or other specific undertaking from which a city may derive a revenue (revenue bonds); and
- Financial instruments on which the debt service payments are contingent upon annual appropriations by the governing body (lease purchase agreements and reimbursable agreements).

With the following exceptions, the City Charter is more restrictive in providing that no debt shall be issued until approved by a majority of the qualified voters at an election. Issuance of the following may be authorized by City Council without voters' approval:

- Up to \$6 million of bonds in any one fiscal year to finance capital expenditures, excluding capital improvements related to water, sewer, gas, and/or electric improvements.
- Up to \$10 million of bonds in any one fiscal year to finance capital expenditures relating to the City's water, sewer, gas, or electric systems or other undertaking from which the City may derive a revenue.
- Up to \$25 million of bonds or notes in anyone fiscal year for capital expenditures relating to the City's water treatment, wastewater treatment, stormwater treatment, solid waste disposal, or recycling facilities, and any extraordinary maintenance improvements or expansions of transmission, and distribution infrastructure for the electric or gas systems.
- Bonds of any amount necessary to pay costs or expenditures related to annexation.
- Refunding bonds issued to refinance existing debt.
- Notes issued in anticipation of revenue not to exceed \$500,000 with a maximum maturity of 24 months.
- Contractual obligations other than bonds and notes, such as lease-purchase contracts.

## 9.2 City of Danville Standards

The City will maintain the following standards to ensure a higher level of financial security than that afforded by meeting minimum State standards:

- Debt to Assessed Value: Debt supported by General Fund tax revenue will not exceed 3.0% of total taxable assessed value of property within City limits. For the purposes of calculating this ratio, assessed value shall include real property and personal property.
- Debt Service to Expenditures: Debt service paid from general tax revenue will not exceed 10% of total General Fund Expenditures, including transfers out.
- Debt Payout Ratio: The City will structure its bond issues to maintain an overall 10-year payout ratio (the amount of principal retired within 10 years) of not less than 60%.
- Derivatives: The City will not use interest rate exchange agreements, swaps, or other derivatives in managing its debt portfolio.

Other standards adhered to by the City of Danville include the following:

- No debt will be issued until an ordinance has been adopted by Council by affirmative vote of two-thirds (six of nine) of its members.

- Long-term borrowing for capital improvements will be confined to such improvements and projects that cannot be reasonably financed from current revenues.
- In consideration of bond issue cost, bond issues shall be appropriately sized, preferably not less than \$3 million. Several projects may be grouped together in a single bond issue. However, no single project element should cost less than \$100,000, as lower level expenditures will be included in operating budgets and financed with current revenues.
- Capital improvements that are financed by issuing general obligation bonds, revenue bonds, or other long-term debt, including lease-purchase obligations, will be repaid within a period not to exceed the expected useful life of the improvement.
- Unless required to be credited to a trustee held account by requirements of a trust indenture, it is the accounting policy of the City to recognize temporary investment earnings on bond proceeds in the General Fund in order to match transfers out to the Debt Service Fund for bond interest expenditures.
- To maintain a predictable debt service burden, the City will give preference to debt that carries a fixed interest rate. However, consideration may be given to variable rate debt. Conservative estimates will be used in budgeting variable rate debt service interest expenses. Variable rate debt will be limited to no more than 20% of total outstanding debt.

### 9.3 Long & Medium-Term Debt

The City makes use of general obligation and revenue bonds for debt financing normally extending over 20 to 30 years and lease-purchase financing for debt paid over five to 10 years.

- General Obligation Bonds -- General obligation bonds will be used for public improvement projects that have a direct benefit to the citizens of Danville. General obligation bonds may be used to finance utility projects if doing so is more cost effective than using revenue bonds. G
- Revenue Bonds -- The City uses revenue bonds to finance utility projects when general obligation bonds are not feasible or cost effective. R
- Lease-Purchases -- Lease-purchase obligations, bonds, or other debt instruments may be used as a medium-term (4 to 10 years) method of borrowing for the financing of vehicles, specialized L

equipment, or capital improvements. Assets with a longer useful life may be lease financed if it is determined it is in the City's best interest. The equipment or improvement must have an expected life of more than five years and cost in excess of \$100,000. Such debt will be paid before expiration of the expected life of the equipment or improvement acquired.

#### **9.4 Short-Term Debt**

The City's policies regarding fund balance and unrestricted cash reserves are designed to eliminate the need to borrow to meet operating cash flow requirements. However, from time to time, as part of an overall plan to stabilize utility rates and manage its utility business over a multi-year planning period, the City may borrow on a short-term basis through the issuance of short-term notes or through the procurement of a line of credit. Security for the notes or line of credit may include a pledge of utility revenues on a gross or net basis or the general obligation pledge of the City. Bond Anticipation Notes (BANs) may be issued for capital related cash purposes to reduce the debt service during the construction period of a project or to provide interim financing. BAN financing is limited to five years or less.

### **10. Capitalization**

Capital costs are costs incurred on the purchase of land, buildings, construction and equipment to be used in the provision of municipal services. Capital costs do not include labor costs except for labor used for construction. Unlike operating costs, capital costs are one-time expenses, although payment may be spread out, or "capitalized," over many years in financial reports. Capital outlays are budgeted as expenditures during the applicable fiscal year and then as fixed assets in financial statements thereafter. The threshold for capitalizing capital assets is \$5,000 for equipment, \$25,000 for capital leases, and \$100,000 for infrastructure and buildings. Capitalization thresholds are applied to individual, rather than to groups of fixed assets. Fixed asset accounts are not treated as having cash value in governmental accounting.

The following policies apply to the capitalization of fixed assets:

- Capital assets are reported as the sum of the initial invoice cost, the value of any trade-in for equipment items, installation cost excluding in-house labor, and ancillary charges, such as freight and transportation charges, site preparation costs, and professional fees. Interest costs for borrowed funds are capitalized for construction projects only.
- Donated capital assets are valued at their estimated fair market value on the date donated.
- Maintenance, repairs, and minor equipment are charged to operations when incurred and are booked as fixed assets in the event

they materially change capacities or extend useful lives of capital assets.

- Depreciation of fixed assets is recorded over applicable useful lives on a straight-line basis.
- Upon the sale or retirement of land, buildings, and equipment, the cost and related accumulated depreciation, if applicable, are eliminated from the respective accounts, and any resulting gain or loss is included in current year's operations.

### **11. Grants**

City departments will take full advantage of state, federal, business, and foundation grants to achieve municipal goals and objectives. The City Manager will ensure that required matching funds are available before making application for grants and that careful consideration is given to administrative and regulatory requirements, as well as accommodation of ongoing operating costs. Grants that require budget adjustments to authorize increased expenditures are taken to City Council in the form of proposed budget ordinance amendments.

### **12. Pay Adjustments for City Retirees**

**Amended by Resolution 2014-06.01 of the Danville City Council, June 3, 2014**

Chapter 32 of the City Code establishes the Employees' Retirement System (ERS) of the City of Danville for the purpose of providing a pension benefit to City employees upon retirement. The City strives to provide a pension benefit that is competitive in order to hire and retain a highly skilled workforce. However, pension benefits must also be affordable and the ERS plan must maintain a healthy funded status with sufficient investment earnings and City contribution levels that are sustainable within the City's budget. This ensures the City's ability to provide a promised benefit to both current and future retirees.

The pension benefit shall be calculated according to Chapter 32, Article III of the City Code. The City will not grant post-retirement cost-of-living increases for its retirees through the ERS. However, in the event that the following criteria are met, lump sum ad-hoc pension bonuses of up to one-half of the retiree's base pension payment may be appropriated by City Council from current operating revenues as part of the annual personnel expense budget. Only those hired before July 1, 2014 are eligible to receive bonuses. The following criteria will be used to consider provision of such bonuses:

1. The cumulative inflation growth since the most recent pay adjustment for retirees as measured by the "All Urban Consumers Consumer Price Index" (CPI-U) has been at least 5%;

2. The Retirement System's funded status for the prior fiscal year is at least 90% (as calculated by dividing actuarial value of assets by the accrued liability as of the appropriate valuation date);
3. The City's contribution to fund the normal cost of the pension plan, as a percent of payroll, for the budgetary period under review is no more than 12%; and
4. Operating revenues from applicable funds are available to cover the cost.

The following chart will be used to determine the amount of bonus to be considered by Council based on varying levels of ERS funding contributions. The bonus amount will be calibrated against the City's combined contribution to fund the normal pension cost. In no event will the Council-authorized bonus exceed one-half of the retiree's normal monthly benefit payment.

<u>City's Combined ERS Contribution as % of Payroll*</u>	<u>% of Bonus Available</u>
> 12%	0
> 11% but ≤ 12%	25%
> 10% but ≤ 11%	50%
> 9% but ≤ 10%	75%
≤ 9%	100%

\*As determined in the appropriate actuarial valuation

Retirees are not eligible for a bonus until the first year anniversary of their retirement date. The retirement date is defined as the first day of the month following the employee's separation date.

The cost of the bonus will be allocated to the various City funds based on each fund's full-time payroll budget.

The effective date of this plan provision is July 1, 2014.

## Appendix

### City of Danville Funds

#### Operating Funds

- The General Fund – The General Fund is the primary operating fund for government activities. Its most significant sources of funding are general property taxes, other local taxes and transfers from the various utility funds. The most significant expenditures from this fund are for public safety, public works programs including infrastructure maintenance, health and welfare programs and contributions to other funds for education and capital improvements. The accounting records are maintained on a modified accrual basis.

#### Enterprise Funds

**Utility Funds:** The Wastewater, Water, Gas, Electric, and Telecommunications Funds are all designed to be self-supporting with user fees that cover the expenses for the collection system and treatment facilities and contributions to the General Fund. All use an accrual basis of accounting.

- Wastewater Fund – This fund provides accountability for activities relation to the treatment of household, commercial, and industrial wastewater.
- Water Fund – This fund provides accountability for activities relating to the treatment and distribution of potable water to residential, commercial, and industrial users.
- Gas Fund – This fund provides accountability for activities relating to the purchase and distribution of natural gas to residential, commercial, and industrial users.
- Electric Fund – This fund provides accountability relating to the purchase of electricity, production of electricity, and operating and maintenance costs. The operating and maintenance costs cover the hydro-electric facilities, transmission system and the distribution system.
- Telecommunications Fund – The Telecommunications Fund is an e-Rate service provider to the Danville Public Schools and the Pittsylvania County Schools and maintains and operates nDanville, a high-tech fiber optic network.

#### Other Enterprise Funds:

- Transportation Fund – This fund provides for activities relating to mass transit bus services. The fund is on an accrual basis of accounting. However, the fund is not self-supporting. Operation and maintenance costs

are paid by user fees from passengers of the bus service, local federal and state grants and transfers from the General Fund.

- Sanitation Fund – This fund provides for activities relating to the collection and disposal of solid waste. This fund is self-supporting with user fees, which cover the operating and maintenance cost. The fund is on an accrual basis of accounting.
- Cemetery Services Fund – The Cemetery Fund provides for funeral services, sale of lots and record keeping. The staff provides services to local funeral homes and can assist residents and non-residents who are interested in purchasing at-need and pre-need burial lots. Additionally, this fund provides for the maintenance of the eight municipally owned cemeteries. The fund is designed to be self –supporting; however, an annual subsidy from the General Fund has been required. The fund is on an accrual basis of accounting.

#### **Internal Service Funds:**

- Insurance Fund – This fund provides accountability for all City costs relating to workers compensation on a self-insured basis, general insurance provided by outside insurance carriers – excluding group health and life, risks covered by statewide pools and risks other than worker compensation on a self-insured basis. The fund is supported by charges to the user departments on a cost-reimbursement basis and is on a modified accrual basis of accounting.
- Central Services Fund – This fund provides accountability for the acquisition of office supplies, the cost of interoffice mail, central mailroom and printing services, which are provided to the various department of the city. The fund is supported by charges to the user departments on a cost-reimbursement basis and is on a modified accrual basis of accounting.
- Motorized Equipment Fund – This fund provides accountability for the acquisition and maintenance of motorized vehicles for various departments of the City. The fund is supported by charges to the user department on a cost-reimbursement basis and is on a modified accrual basis.

#### **Special Funds:**

- Capital Projects Fund – General Government – This fund provides accountability for financial resources used for major construction projects relating to general government use. Funding resources include proceeds from the sale of bonds, federal and state grants and transfers from the General Fund. The fund operates on a modified accrual basis of accounting.
- Community Development Fund – This fund provides accountability for projects and programs involving Federal funds received through the Community Development Block Grant (CDBG) program. Funding

resources include CDBG funds and program income from some of the programs. The fund operates on a modified accrual basis.

**Fiduciary Funds:**

- Cemetery Maintenance Fund – This fund is a permanent fund used to account for funds set aside to provide for the perpetual care of the City cemeteries. Only the earnings from the investments of this fund may be expended.
- Retirement Fund – This fund is used to account for the investments of the City of Danville Employees Retirement System. This fund is audited and provides financial reports separate from all other City funds. Funding is provided by contributions from the City and investment earnings.
