IFB 18-19-061
"Danville Water Treatment Plant Filter Valves Improvements"
Addendum No. 4

Clarification for SCADA and Signal Work: Bidders shall be responsible for furnishing and installing signal conduit and wiring for new or replaced instrumentation for this project; however, the current bidding documents do not provide sufficient information and details to scope and cost the signal work. Therefore, Bidders shall furnish bid package documents without any SCADA and associated signal work included, particularly costs. Prior to the start of work, the Bidder awarded the project will be furnished with the necessary information and details for the SCADA and signal work, and will negotiate for an agreed upon cost for this portion of work with the Owner and Engineer on top of the overall contract amount indicated in their respective bid package documents. Bidders shall ensure all other work indicated in the bidding documents for this project is included with their respective bid packages. For Bidders that may have corresponded with the SCADA representative (DR Controls LLC), any costs provided by the SCADA representative shall be disregarded and not included with the bid package documents. As noted in the bidding documents, DR Controls LLC will be working under a separate agreement with the Owner for the SCADA integration and signal terminal connections related to the new and replaced instrumentation on this project as well as furnishing the new table tops for the filter control consoles (Bidder responsible for installation).

Any other specifications remain the same.

J. Gary Via, Director of Purchasing
