Danville Science Center's Digital Dome Theater now open

Danville Science Center's new Digital Dome Theater is now open. The theater illuminates the universe with stunning clarity and brilliance. Journey through the nearly inexhaustible supply of stars adorning the night sky and uncover the most mysterious and beautiful sights in the solar system.

Also featuring giant screen films, the Digital Dome Theater will display breathtaking presentations on its gigantic 40-foot screen. Adventurers of all ages can migrate with millions of Monarch butterflies across North America and travel the cosmos without leaving their seats!

Want your group to experience the Digital Dome Theater? Simply give the center a call to add a show to your school visit at 434.791.5160 ext. 0.

The center thanks the J.T. Minnie Maude Charitable Trust for its recent gift supporting the dome project. Danville Regional Foundation is providing crucial funding for the Digital Dome Project.
